DYNASAFE delivers safety to the Olympic games in Beijing

The police authority in Beijing is focusing on safety during the 2008 summer Olympic Games and has made several new equipment investments. One important investment has been the purchase of a mobile bomb chamber with the highest security level.

Dynasafe AB in Karlskoga Sweden, was awarded to build the mobile bomb unit to the Beijing police and has during the past 12 months manufactured and tested the unit. The delivery was made in the spring of 2008. During June of 2008, Dynasafe AB employees have performed training on site for Beijing Police bomb squad officers and service personal.

The mobile bomb unit is an advanced gas-tight chamber with high capacity, radioactive shielding and an internal heating system. The internal heating system provides the opportunity to incinerate any known explosives inside the closed chamber. Dynasafe has also delivered a gas treating and gas cleaning unit along with the mobile bomb chamber.

Dynasafe AB is world leading R&D and manufacturer of bomb chambers and this specific order to the Beijing Police underlines the company's international competitive strength.

Dynasafe AB has involved several sub-suppliers for this project, mainly CS-produktion in Säffle, Jubo-Kvalitetsproduktion in Karlskoga and KIA in Karlstad. The Mobile bomb chamber has gone through final testing at Bofors Test Center in Karlskoga.
